OBJECTIVE

To obtain a long-term position with a firm in which I can contribute to developing technical solutions to information management problems.

QUALIFICATIONS

Through my 15 years of computer science education and programmer/analyst experience, combined with five years as owner/operator of three franchise restaurants, I offer a blend of entrepreneurial spirit, problem solving capabilities, technical knowledge, and team playing/building skills.

WORK HISTORY

05/2009-Present Senior Applications Analyst, South Carolina Retirement Systems – Columbia, SC

Developed new transaction functionality for external organizations to do enrollments and make account changes. Wrote the back-end portion of an online Installment Accounting reporting form. Rewrote the Installment Loan payoff screen. Rewrote and rePrimary focus is Natural 6.3.3 on UNIX.

03/1998-03/2009 Senior Consultant, Software AG, Inc. - Reston, VA

09/2008 – 10/2008 Louisiana Department of Social Services – Baton Rouge, LA

Performed emergency assistance with disaster system for Hurricanes Gustav and Ike. Primary focus was new development and maintenance in Natural 4.1.4.

06/2008 – 11/2008 City of Montreal – Montreal, QC, CA

Upgrading Software AG products to current levels. Primary focus was code remediation of Natural 2.2 to 3.1 using Natural Engineer 6.1 for impact analysis.

11/2004 – 12/2007 South Carolina Employee Insurance Program – Columbia, SC

Developed and maintained a web services Employee Benefits System for enrollments and benefits changes. Primary focus was a UNIX Natural 6.2/Adabas 5.1 back-end against a Java web interface.

07/2001 – 07/2004 Pennsylvania Department of Transportation - Harrisburg, PA

Developing and maintaining a web services federal Crash Reporting System for all statewide crashes reported to police. Primary focus was a Lotus Domino R5 web interface against a mainframe Natural/DB2 back-end.

03/2001 – 07/2001 University of Hawaii West Oahu – Pearl City, HI

Determine needs for future projects, evaluate solutions, and resolve issues, including resolving Construct upgrade issues using Natural NT 4.1.2 issues.

01/2000-02/2001 Hawaii Employee Retirement System – Honolulu, HI

Created the Service Acquisition, Service Contribution, and Employer Reporting portions of a new retirement system for State employees on a Unix system using Construct 3.3.3, Natural 3.1.1, and Adabas on the backend, and EntireX DCOM middleware to connect the two.

12/2000-01/200 Hawaii Child Support Enforcement Agency – Kapolei, HI

Emergency programming and analysis, and employee training in a mainframe environment using Natural 2.3/Adabas.

04/1998-01/2000 Thomas & Betts - Memphis, TN

Created the Customer Profile portion of a European Order Entry System for Thomas & Betts. Automated EDI orders and order changes, using CONSTRUCT 4.1.2, Natural 2.3.4, Adabas 6.2.1, Predict 3.4.1, TSO, JCL, NATRJE, etc. with Entire Connection 4.1.2. Created and participated in a variety of pieces of a U.S. and Canada order processing system including Intermediate Receiver, Commissions, Pricing, etc. Integrated new U.S. and Canadian systems with the European system. Performed some web enablement of the aforementioned system using iXpress 2.6.2 and EntireX middleware. Performed technical evaluations of potential Software AG employees.

12/1997-03/1998 Consultant, The Computer Merchant - Foxborough, MA

Developed new payment functionality and processing capabilities using Natural, Adabas, Predict, TSO/SPF, JCL, etc. Developed, tested, debugged, and documented streamlined billing, payment and reconciliation processes in both online and batch environments saving Commercial Union Insurance Company approximately \$500,000 annually.
